Subject Tested: Yitzchok Fisher

Examiner : Judd Bank

March 29, 2006

The above named subject was interviewed and voluntarily took a polygraph examination on the date indicated on the date indicated. The examination utilized equipment which indicated and recorded on a moving chart relative changes in blood pressure, rate and strength of pulse beat, galvanic skin response and breathing pattern.

Purpose of Examination:

To determine truthfulness of Subject's Statements regarding the relevant questions listed below:

Question Format:

The below indicated questions were asked of the subject during the overall examination. The subject responded to question #33 with a "No" answer and responded to questions # 35 and 38 with a yes answer.

Format Used: Backster Direct Involvement Examination

Questions Asked:

- (33) When you performed a bris on Baby Spera, in November of 2003, in Staten Island, did you place your mouth on Baby Spera's penis ?
- (35) Before you performed a bris on Baby Spera in November of 2003, in Staten Island, did you notice a rash on the baby's groin area ?
- (38) When you noticed the rash on Baby Spera's body, did you inform the parents that it might be viral and potentially dangerous ?

Result and Conclusion:

In the opinion of this examiner, after careful analysis of the subject's (Yitzchok Fisher) polygraph charts, it is felt that the subject was being truthful regarding the pertinent questions asked.
